**Weekly Journal Entry**

*Write a brief review of your internship experiences for this week. Think about the methods you used or observed, materials you found or made, where were you successful and where can you improve? What did you learn about planning, discipline, or the profession? What would you like to repeat and what would you re-use with improvements?*
What do you intend to do differently next week and what help do you need in order to continue growth as a teacher?
