Instructions for Installing Client Software

Here are the directions to install the client software needed to run Maple and MATLAB from a PC on campus:

1. Maple

    (a) Go to start run and type

    `\\152.30.22.214`

    (b) In the username and password type: `mapleuser` and `canada4` respectively.

    (c) Go into the `Maple9` folder and then to the `Client` folder and run `WinClientSetup.exe` (by double clicking on the icon).

2. MATLAB

    (a) First create a folder in the c drive and call it example `matlabfiles`

    (b) Create a shortcut on the desktop by going to the desktop, right-clicking, and selecting `New` then `shortcut`. For the location type in:

    `\\152.30.22.214\matlab\bin\win32\matlab.exe`

    (c) Once the icon is created right click and go to properties.

    (d) Under the `Shortcut` tab, in the `Start in` box, type

    `C:\matlabfiles`

    (or what ever name you created in Step 2a)

HAPPY COMPUTING!
