Teacher Movement Coding Sheet

Teacher: Observer:

Content: Class/Grade:

Date: Total Lesson Time:

This instrument is used for event recording of teacher movement in the classroom. This instrument can be used in a "live" teaching setting or in conjunction with videotaped lessons.

Each box represents five (5) minutes of class time. Draw a continuous line indicating the teacher's movement through the area for each 5-minute interval. Analyze each of the 5-minute time segments to assure that the teacher is getting to all areas of the facility where students are working.
