

## **Macro Delivery System: Health Care System**

- I. Context: Well-being, universal
  - A. Conceptual Basis: Salutogenesis
    - 1. Variables
      - a. Dependent variable
      - b. Independent variables
        - 1. Biochemical/physical
        - 2. Artifactual/Material
        - 3. Cognitive
        - 4. Valuative/Attitudinal
        - 5. Emotional
        - 6. Interpersonal/Relational
        - 7. Extrapersonal/Macrosociocultural
    - 2. Utility (limited)
  - B. Paradigm: eclectic
    - 1. Scientific
    - 2. Revelation
    - 3. Experiential
- II. Process: Lifestyle
  - A. Focus: individual instances & aggregate
  - B. Initiator: choices
  - C. Organizer: continuum classification
  - D. Mode: proactive
  - E. Orientation: quality of life
  - F. Range of Activities: spectral
    - 1. Disease prevention
    - 2. Health maintenance
    - 3. Health promotion
    - 4. Wellness
- III. System
  - A. Components: unorganized heterogeneity
    - 1. Services: intangible, value laden (individual and aggregate)
    - 2. Recipients: imperfect knowledge, active, privileged
    - 3. Providers: animate, inanimate, specialists, questionable
    - 4. Payers: public, private
    - 5. Regulators: public, private
    - 6. Others:
  - B. Funding (Cost): skewed, irrational
  - C. Accessibility: inequitable
  - D. Benefits (quality outcome effectiveness): variable
