

Students' Ethical Experiences

This week, in lieu of discussing a relevant case, I would like for each of you to share an ethical issue, decision, situation, etc. that you have experienced in your position in EMS. Please include the issue at hand, ethical implications, questions asked, decisions to be made, how you made your decision, implications of the decision that you made, etc.

I would ask that you be extremely discretionary and would caution you to respect the confidentiality of other individuals involved in your experience.

In addition, I would ask that each of you join in a lively discussion of each other's experiences.

My goal in this exercise is to glean from other's experiences and to bring issues to light that help guide us in understanding the broad array of ethical issues that occur in our daily lives.
