

Finish Your Digital Story in WeVideo and Save or Upload to Vimeo and Set Password

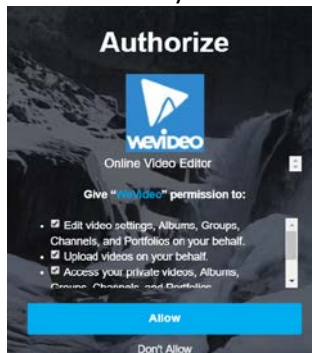

After your digital story is complete, click on the top menu item to “Finish”

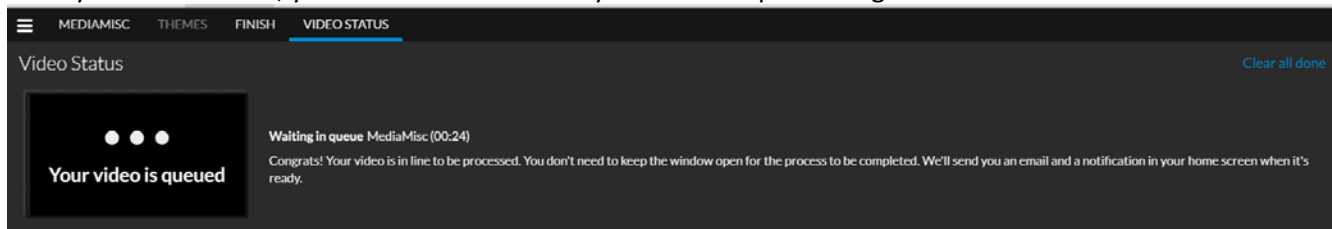

At this point you, will be taken to a screen that asks you to name your video. Go ahead and do this and then you’ll see the following screen. Click the “V” icon at the bottom of the screen until it turns blue; this indicates that you have selected it. Next, click “Finish” and your video will begin the process of being completed.

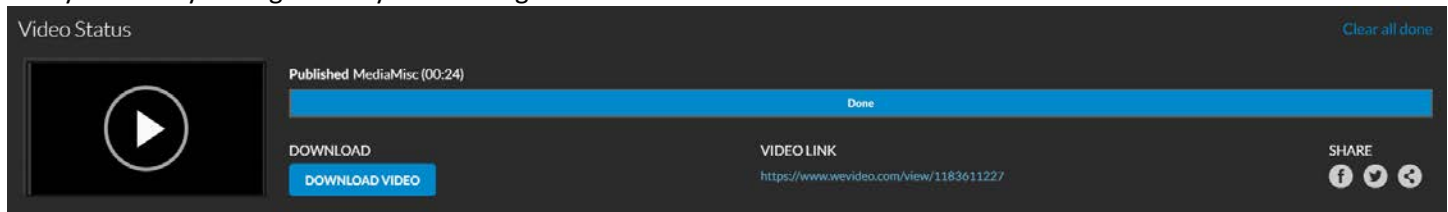

The first time you save to Vimeo, you will be asked to allow WeVideo to “talk” to Vimeo to save your video. Click “Allow.”

After you click “Finish”, you will see the status of your video as processing:

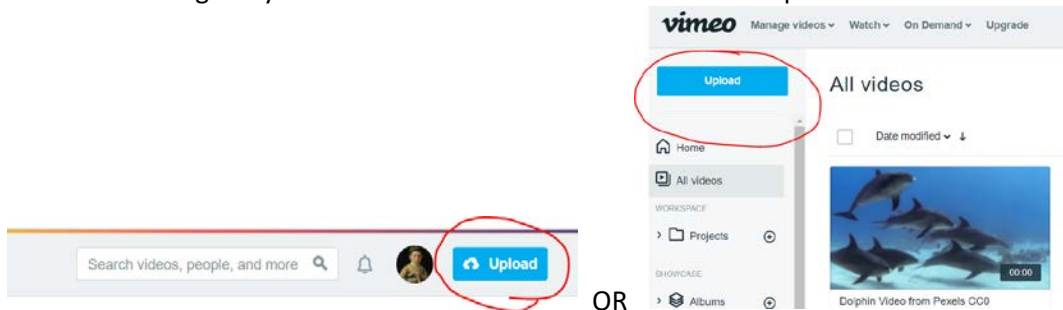

Once completed, you can download your video as a file or link to it from the WeVideo link. It is **not recommended** to use the WeVideo link since you cannot set a password for your digital story using this option. Instead, it **IS recommended** that you share your digital story video using Vimeo.

Second Way to Put Digital Story in Vimeo:

If you do not use the “Save to Vimeo” option when you “Finish” your video, you can instead download the video file to your computer and then log into Vimeo to upload it using the approach we practiced in class. First log into your Vimeo account at <https://vimeo.com/>. Once in your Vimeo account, if you get the option to buy or upgrade your account, click “No Thanks” to go to your Vimeo account dashboard and click “Upload Video”.

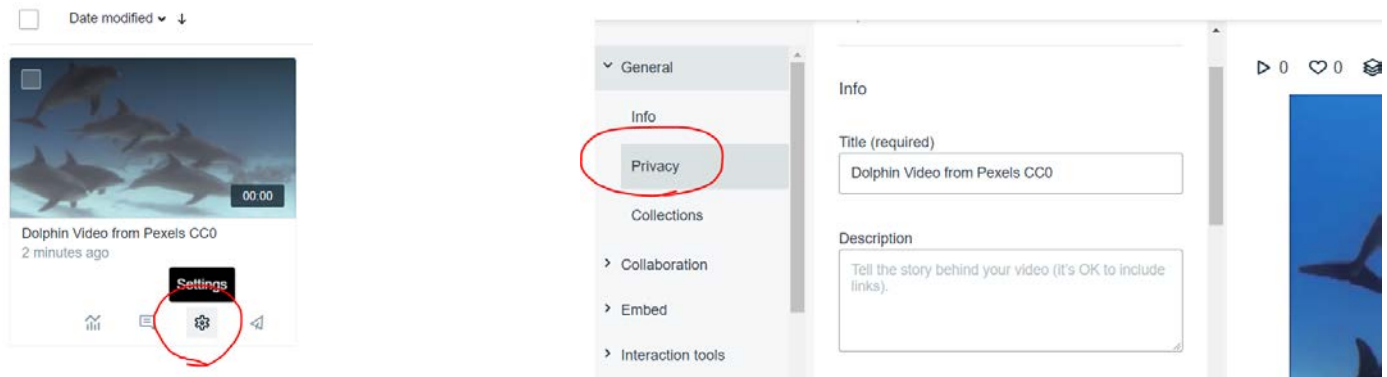

Once your video has been uploaded, you will need to access the privacy settings to set a password.

YOU WILL NEXT SET A PASSWORD FOR YOUR VIDEO

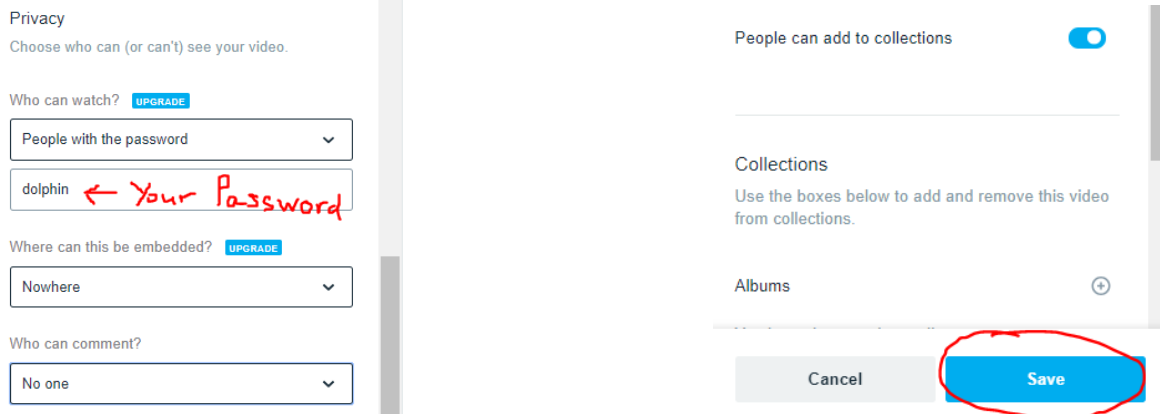

To set the password:

Once logged into Vimeo, look for your video (either saved from WeVideo or uploaded as a video file). Click on the settings icon (it looks like a wheel) to access settings and then click the “Privacy” menu item on the left to set up the following privacy settings:

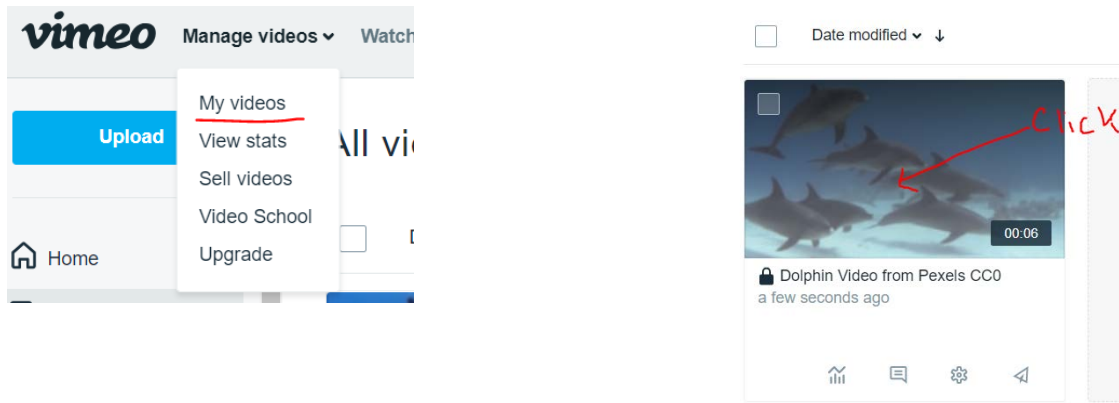

All videos

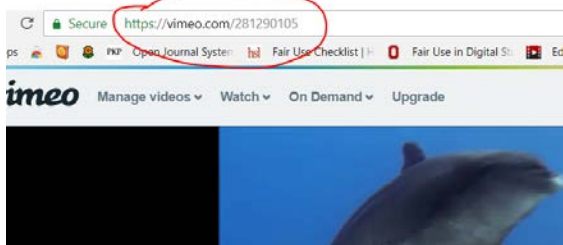

Once in the Privacy settings, choose the following:

Once you have saved, go back to “Manage Videos >> My Videos” and then click in the middle of the Video to go to it.

Once you are at your video to view it, copy and paste the URL or web address from the browser:

THAT is the link to show your video to others. You will copy and paste this link into your digital story reflection document and also send me the password you have set for your video.
